

# Greenfield Local Hub (Paired code Review)

To be completed by Technical codereviewers

## Authentication and user security

How well does the developer implement the following

1. Does the system have appropriate hashing of sensitive information when logging in?

*Mark only one oval.*

☐ Yes

☐ No

2. Is user input validated and sanitised on both client and server side before being processed?

---

3. Does the password validation meet required standards

*Mark only one oval.*

☐ Yes

☐ No

## 4. Do Login and Logout functions work reliably?

*Mark only one oval.*

☐ Yes

☐ No

## 5. Any security issues you noticed?

---

## 6. Suggestions to make authentication and security better?

---

---

---

---

---

### Basket/Checkout Function

## 7. is basket state managed consistently across page refresh and navigation changes?

---

## 8. Is the checkout flow clearly structured, and are users given adequate feedback at each stage (Error messages, Loading states)

*Mark only one oval.*

☐ Yes

☐ No

9. How well do forms handle validation errors when II datatypes are used?  
(erroneous, extreme, normal)

*Mark only one oval.*

|     |                       |                       |                       |                       |                       |           |
|-----|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------|
|     | 1                     | 2                     | 3                     | 4                     | 5                     |           |
| Poo | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | Excellent |

10. Any suggestions for improvement of the basket and checkout logic?

---

---

---

---

---

### Accessibility

How accessible is the platform based on its accessibility settings

11. Does the Application meet WCAG 2.1 AA Standards, and are there any obvious violations present?

---

12. Does dark mode toggle work on all pages

---

13. Are Font size, High contrast and Text to speech functions all usable?

|  |                       |                       |                       |                       |                       |  |
|--|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|--|
|  | 1                     | 2                     | 3                     | 4                     | 5                     |  |
|  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |  |

14. Were any features hard to use or inconsistent in the accessibility tab?

---

15. What could improve the accessibility of this website further?

---

---

---

---

---

### Products Page

16. How well does the page perform with a large number of products?

---

17. Are product images optimised for web and do they have appropriate fallback handling if they fail to load?

*Mark only one oval.*

☐ Yes

☐ No

18. How clean and maintainable is the component structure for the products page?

---

19. Does search or filtering functionality return accurate results and handle edge cases like no matches?

*Mark only one oval.*

☐ Yes

☐ No

## Static Pages

About page, Producers page, Policy page

20. Is the content on each static page accurate, well-written and relevant?

*Mark only one oval.*

☐ yes

☐ No

21. Are the static pages consistently styled and visually coherent with the rest of the application?

*Mark only one oval.*

☐ Yes

☐ No

22. Does the policy page cover necessary legal terms-of-use content, and is it easy to navigate?

*Mark only one oval.*

☐ Yes

☐ No

23. Does each producer correctly redirect to the products page filtered to their own products?

*Mark only one oval.*

☐ Yes

☐ No

#### Code quality and prototype architecture

24. Is the project folder structure logical, consistent, and easy to navigate for a new developer?

---

25. Are functions and components kept small, focused, and single-purpose, or is there evidence of bloated, overloaded logic?

---

26. Is naming (variables, functions, files, components) descriptive, consistent, and self-documenting?

*Mark only one oval.*

☐ yes

☐ No

27. Is there meaningful use of comments where logic is non-obvious?

*Mark only one oval.*

☐ Yes

☐ No

28. Is there evidence of code duplication that could be refactored into shared utilities or components?

*Mark only one oval.*

☐ Yes

☐ No

29. How well does the architecture scale? are there obvious bottlenecks or design decisions that would cause problems as the project grows?

*Mark only one oval.*

1   2   3   4   5

Poo ☐ ☐ ☐ ☐ ☐ Scales very well

30. Any Improvements to be made to the project architecture?

---

### SOLID Principle Application

31. Does each class or module have a single, clearly defined responsibility (Single Responsibility Principle)?

---

32. Is the codebase open for extension without requiring modification to existing working code (Open/Closed Principle)?

---

33. Are subclasses or derived types used in a way that is fully substitutable for their parent types without breaking behaviour (Liskov Substitution)?

---

34. Are interfaces or abstractions kept minimal and role-specific (Interface Segregation)?

---

35. Do higher-level modules depend on abstractions rather than concrete implementations (Dependency Inversion)?

---

36. Suggestions on how to fix any of these issues

---

---

---

---

---

### Dashboard Function

Complete the following questions based on your review of the dashboard function

37. Does the dashboard display accurate, up-to-date data, and is it clear where that data is sourced from?

*Mark only one oval.*

☐ Yes

☐ No

38. How well is access to the dashboard controlled? Is it properly restricted to authorised roles only?

---

39. Are dashboard components clearly laid out and easy to interpret without additional guidance?

*Mark only one oval.*

- ☐ Strongly disagree
- ☐ Disagree
- ☐ Neutral
- ☐ Agree
- ☐ Strongly agree

40. How does the dashboard handle scenarios where data is sparse, missing, or still loading?

---

41. Are any data visualisations (charts, tables, stats) implemented correctly and in proportion to the data they represent?

---

42. How maintainable is the dashboard code? would it be straightforward to add new widgets or data points in future?

---

43. Any suggestions to improve the dashboard Logic?

---

---

---

---

---

Summary and final judgement

44. What are the three strongest aspects of this submission, and what makes them stand out?

---

---

---

---

---

45. What are the three most critical areas for improvement, and what specific steps would you recommend?

---

---

---

---

---

46. How production-ready is this prototype on a scale of 1–10, and what is your justification?

*Mark only one oval.*

1 2 3 4 5 6 7 8 9 10

---

☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐

---

47. Are there any security, performance, or accessibility concerns serious enough to block progression to the next stage?

---

48. How well does the overall implementation reflect the developer's understanding of the brief and its requirements?

*Mark only one oval.*

|                       |                       |                       |                       |                       |
|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| 1                     | 2                     | 3                     | 4                     | 5                     |
| <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
